How to best make use of this User Guide

This User Guide is meant to support applicants as follows:

- The application is online and therefore to fill in and submit an application one needs a User Account.
 - If you already have this User Account, proceed with the application.
 - If not, go to <u>Tutorial: Application Portal Sign In Procedure</u> to seek guidance how to register your User Account.
- **Project Title** The first step when compiling an application is to insert a **Project Title** and a **Project Summary.** Once these are inserted, the user is required to click the '*Create*' button.

Note that once the '*Create*' button is clicked the Project Title cannot be amended. It is suggested that the project title is kept concise and clearly describes the investment project. Meanwhile, the Project Summary can be amended later in the Executive Summary.

- The application is presented in five sections (Section 1 to 5) and each respective section is supported with relevant tips and information how to fill the data. For easier reference, the tips and information are provided in boxes with a grey background.
- Annex I to Annex III provide other information needed to support the application.
- Should ICT technical support be required, kindly contact the Measures and Support Division on 2555 2642 or <u>msd.eufunds@gov.mt</u>, or the Structural Funds Database (SFD) Unit on 2555 2646 or <u>support.fondi.eu@gov.mt</u>

Following the completion of this segment, the user must save the application form by clicking on the **'Save'** button found on the right-hand side of the screen in order to populate the drop-down function found in the next question.

3.6 - National and Horizontal Priorities

Confirm that the planned investment is in line with the National and Horizontal Priorities. Projects that are not in line with the National and Horizontal Priorities will not be considered eligible. In this regard applicants are asked to confirm that the answer is 'YES', and to provide an explanation to this effect.

Is this project in line with the National Priorities?

o YES

o NO

In the box below, please explain your above reply.

Is this project in line with the Horizontal Priorities being Environmental Sustainability and Equal Opportunities?

o YES

• **NO**

In the box below, please explain your above reply.

Confirm that the planned investment respects the National and Horizontal Priorities.

Failure to do this will render the project ineligible. Applicants are to tick 'YES' to the provided questions.

Furthermore, those projects that support the 'YES' reply with an explanation and justification of their reasoning (in the space provided), including how the planned investment is linked to and respects National and Horizontal Priorities will be rewarded. (Max 5,000 characters)

3.7 – Do No Significant Harm Principle

Confirm that the planned investment respects the conditions of the Do No Significant Harm (DNSH) principle in line with Article 17 of Regulation 2020/852.

The six DNSH environmental objectives set out in Article of Regulation (EU) No 2020/852 include: Climate change mitigation; Climate change adaptation; The sustainable use and protection of water and marine resources; The circular economy including waste prevention and recycling; Pollution prevention and control to air, water and land; The protection and restoration of biodiversity and ecosystems.

Projects that do not respect the above objectives will not be considered eligible. In this regard applicants are asked to confirm that the answer is 'NO', and to provide an explanation to this effect. Where necessary, applicants may also provide further

analysis and/or supporting documents, in a targeted and limited manner, to further substantiate their replies to these questions.

Is the measure to lead to significant harm to the six environmental objectives above?

• **NO**

o YES

In the box below, please explain your above reply.

When it comes to the *Do No Significant Harm Principle* applicants are asked to confirm that the answer is 'NO', thus confirming adherence to the environmental objectives. Furthermore, those projects that support the 'NO' reply with an explanation and justification of their reasoning (in the space provided), including how the planned investment is linked to and respects National and Horizontal Priorities will be rewarded.

The Measure focuses on the provision of grants for private businesses including support for new business ventures, thereby encouraging a diverse and healthier economy. Although the purchase of hardware and equipment will result in increased power consumption, this is minimised because the new system/equipment will be energy efficient. The new investment supported may be replacing less efficient assets with a view to reap operational efficiencies. Applicants will also be encouraged to incorporate possible greening and/or climate mitigation measures. Resources procured are to be resource efficient and durable.

Investments are unlikely to result in significant waste generation. Beneficiaries will be required to dispose of hardware and equipment following specific procedures to ensure that reuse and recycling will be pursued as much as possible. Disposal of replaced equipment should be in line with Subsidiary Legislation 549.89 titled Waste Management (Electrical and electronic equipment) regulations lays down measures to protect the environment and human health by preventing or reducing the adverse impacts of the generation and management of waste from electrical and electronic equipment (WEEE) and by reducing overall impacts of resource use and improving the efficiency of such use in accordance with regulation 2(2) and Schedule 5 of the Waste Regulations. Applicants may seek guidance from the Environment and Resources Authority on the appropriate disposal of WEEE products mentioned above. (Max 5,000 characters)

The investment project proposal must include a comprehensive budget breakdown. In this section, the user is to choose the activity e.g. *Digital Solutions*, insert a sub-activity in relation to the activity, and then for each respective sub-activity one is to insert a start date and end date, describe the sub-activity, insert any comments, and define the budget in the provided fields accordingly. The total costs of the investment will be automatically calculated through the summation of costs of all the Sub-activities inserted by the user. This is further explained field by field below.

Digital Solutions

The items identified under this sub-activity shall be any digital solutions including but not limited to hardware, software and cloud computing and should be defined in line with the applicable accounting standards and will need to be recorded in the fixed asset register accordingly. In those cases where there are various items under the digital solutions, these are to be included as different sub-activities under this activity. Any training costs limited to the use of the specific item acquired and included in the purchase price of the item in question, and thus from the same provider shall be included in the eligible cost.

7% Flat Rate – Indirect Costs

A 7% Flat Rate based on the total eligible cost of the other activities to be used for indirect costs. Once the first sub-activity under *Digital Solutions* is entered and saved, the 7% Flat Rate is automatically added to the financial plan and its value will update whenever a new sub-activity is entered.

Investment Priority (IP)

The Investment Priority (IP) that is set with the call and which is relevant to the investment will be included automatically with every Sub-activity listed.

Start and End date

The user is to insert the start and end date for the investment by choosing the dates from the automatic calendar that pops up when the field is clicked on.

In determining the earliest start date for activities, Applicants are to give due consideration to the fact that 'start of works' may not be initiated prior to the award of the grant, i.e. signing of the Grant Agreement. The signing of the Grant Agreement may only take place following the conclusion of the evaluation process of the applications received by the cut-off date. Operations should be concluded by 30th June 2026.

If an activity is saved to the financial plan with an incorrect date, the user should delete the activity from the financial plan and re-enter the activity with the correct data.

sco

The option 7% flat rate to finance any indirect costs related to the investment is to be chosen.

In this section, the user should specify the costs (in EUR) in the fields provided. Users should note that the amounts entered should not contain any characters such as 'comma' but only figures, so that for example an amount of '€20,000' would be simply entered as '20000'. The ' Eligible ' costs are to be inserted in the respective field. The VAT for both eligible and non-
The ' Non Eligible ' costs indicated under this section need to reflect any expenditure (excluding VAT) related to that Sub-activity but which is ineligible for funding as specified in the scheme Guidance Notes.
The Gozo Contribution Financial Plan will be greyed out if the user did not provide an address in Gozo in Section 3.1 of this application. On the other hand, if an address in Gozo was provided, the user will need to fill out both the 'Total Financial Plan' section and the 'Gozo Financial Plan' section with the same information.
When all information has been inputted, click on the 'save' button at the bottom of the screen. Once the details have been saved, these will show up at the top part of the Financial Plan and additional Sub-activities can then be added by using the same process.
When adding activities to the financial plan, Applicants are to keep in mind that these should be itemized. Sub-Activities should not be batched together under one activity, instead the Applicant should create an Activity for every Sub-Activity that one intends to include in the financial plan.

- **Private Match Financing** Provide documented evidence to prove that the applicant has available private funds, i.e. funds not originating from any source of public funding, to see through the project. This can be evidenced for example through:
 - The provision of a Letter of Intent/Sanction Letter issued by a bank (identifying the amount of lending that the bank is willing to lend); or
 - o Bank Statements showing that the enterprise has the necessary liquidity; or
 - In the case that private sources such as crowd funding etc shall be used, documented evidence that such funds are readily available is to be submitted; or
 - Any other documented evidence showing that the applicant has access to the necessary private funds.

either an

• Investment Proposal –

A detailed investment proposal that as a minimum, shall include the following:

- Description of the needed investment
 - Describe the item's function within the operations and, in brief, the need for its purchase.

• Technical specifications for each specific investment;

• These are intended to provide a baseline for comparability. The product/model may well be distinct, but it should nonetheless be possible to have a common denominator when it comes to amounts/size/ capacity/output/material etc. The minimum technical specifications do not necessarily need to be an absolute value (e.g. table with 1.5m in length). It can be a range (e.g. 1.2-1.6m length), or a lower or an upper boundary (e.g table with length of minimum/maximum 1.5m). While not intended to be overly specific, and allowing for some leeway, the applicant nonetheless needs to outline what they are looking for in the item for which aid is being requested.

Description of what is available on the market;

- There may be off-the-shelf solutions, or a completely custom-made solution is required, or a hybrid of the two can fulfil the applicant's needs.
 Whichever applies, the applicant is to outline which different versions or brands for the item exist on the market at present.
- Identification of which suppliers offer the required investment and the price range- for each investment;
 - For items which have a broad range of suppliers, it is naturally expected that the market leaders are included within the list of options considered, and that the list of suppliers is sufficiently large accordingly (e.g. one cannot justifiably list just 3 suppliers of laptops, because the local market alone includes many more than 3 suppliers). A price range can be provided for the item itself, rather than by specific supplier. One is to ensure that an explanation is provided in instances where the price range is broad
- From the options considered, those that meet targets and requirements of the applicant should be identified.
 - If all the suppliers mentioned in the above section are considered as meeting the applicant's needs, then this is to be explicitly mentioned. If any don't, then a substantive and reasonable justification thereof is to be provided accordingly.

- Provide brief background information on each of the suppliers identified provided, together with their website URL and/or online link of each.
- or
- **Technical Specifications and Quotations** (limited to 3 distinct items and multiples thereof)
 - The set of minimum technical specifications against which the quotations provided were sought. These should determine the minimum characteristics of the equipment, plant and machinery identified by the beneficiary, and that a supplier must provide. These should be clear, accurate and contain a description of the beneficiary's needs to enable the suppliers to provide the asset/s which meet those needs; and
 - Submit at least 3 similar quotations in respect of each sub-activity in line with the set minimum technical specifications and obtained from three different external and unrelated suppliers to the applicant. Quotations not meeting the requested technical specifications may not be considered by the beneficiary.
 - Brief background information on each of the suppliers identified provided, together with their website URL and/or online link of each.
- **Digital Intensity Assessment** a pre-digitalisation project digital intensity assessment issued by the <u>Malta Digital Innovation Authority</u>² done together with MDIA's <u>Digital Maturity Assessment</u>, defining the current adoption of technology. The assessment will also identify any Cyber Security, Internet of Things (IOT), Artificial Intelligence (AI), Big Data analysis, Cloud Computing or Quantum Technology items being applied for. The Digital Intensity Assessment shall include the following:

Annex III – Exporting and saving the Application Form

Applicants may generate a copy of the online application form, in either Excel, Word or PDF format (whichever is required), at any stage of the application process. This can be done by clicking on the print functionality button that is available on the right-hand side of the screen (see below).

This shall then generate a screen informing the user that the application form is being exported. Applicants are to click on the "floppy disk" icon found at the top right corner of the screen and generate this application form in the format required.
