

NATIONAL PROGRAMME AMIF

IDENTIFICATION OF THE DESIGNATED AUTHORITIES

Competent authorities responsible for the management and control systems

Authority	Name of the authority	Name of the person responsible for the authority	Address	E-mail address	Date of designation	Activities delegated
Responsible authority	Funds and Programmes Division	Mr Raphael Scerri	Funds and Programmes Division, Triq il-Kukkanja Santa Venera	raphael.p.scerri@gov.mt	27-May-2014	
Audit authority	Internal Audit and Investigations Department	Ms Amanda Zammit	Internal Audit and Investigations Department, Valletta Buildings, South Street, Valletta	amanda.e.zammit@gov.mt		
Delegated authority	Treasury Department	Ms Paulanne Mamo	Development House, St Anne's Street Floriana	paulanne.mamo@gov.mt		Payments to Beneficiaries

Management and control system

The Management and Control System for the period 2014 to 2020 is based on the system adopted for the SOLID Funds. This decision was taken on the fact, that the system has been tried and tested, and the audit authority issued a clean systems audit. It has benefitted from a steep learning curve which takes into account best practices gathered, not only during the implementation of the SOLID funds, but also from other funds which fall under the responsibility of the Funds and Programmes Division. The system will be made up of the Funds and Programmes Division as the Responsible Authority, the Treasury Department as the delegated authority for payments and the Internal Audit and Investigations Department as the Audit Authority. Each authority is a separate entity thus ensuring separation of duties, each authority having its own monitoring and or control tools.

1. EXECUTIVE SUMMARY

Malta has experienced heavy influxes of irregular migration over the years, the large majority departing from North Africa and applying for international protection. A large percentage of asylum-seekers are found eligible for international protection in view of the situation in their Country of Origin (CoO). A number of TCNs arrive in MT through legal channels, be it for employment, study or other purposes.

MT will continue to focus on meeting the basic needs of the migrants arriving in MT in an irregular manner. Work will be undertaken to provide adequate accommodation facilities together with the provision of basic material aid such as food, psychological support and health services. It is Malta's objective to improve accommodation facilities throughout the programming period & be able to accommodate migrants in the case of influxes.

New buildings are envisaged to be constructed in order to increase the capacity to accommodate asylum seekers. Refurbishment of the centres will be ongoing. Asylum seekers will be in open centres, unless detention is deemed necessary, in line with the Reception Conditions Directive, on the basis of an assessment of each case. Medical care will be given immediately upon arrival which will be followed by continuous medical checks by doctors, nurses and other professionals. Secondary health care services including emergency and mental health services will be provided.

Those suffering from infectious diseases will be treated in a specialised Unit within the general hospital. Psychological support will be given to all those found to be suffering from trauma following the voyage they would have undertaken. Victims of Human Trafficking will be given specialised treatment and related services.

Vulnerable individuals will continue to be given specific attention through services tailored for their needs. Minors under 18 years will be placed under care orders and provided with the welfare assistance in order to be able to settle and integrate in Malta. Legal guardians are only appointed for unaccompanied minors or, exceptionally, for accompanied minors when it is deemed in the best interest of the child. Accompanied children are provided with care whilst living with their families, to ensure family unity.

Irregular immigrants will continue to be informed of their rights and obligations and their right to apply for asylum. Legal aid will also be provided. Investment in the asylum determination process, through training and human resources, will be made available in order to determine cases at first instance within 6 months or less. The return of irregular immigrants will be further facilitated through investment in instruments to help identify forged documents. The fund will also enable the relocation of migrants who have made an asylum application and are registered accordingly in Eurodac. Cooperation with CoO will continue to improve the return procedure & to attain the necessary documentation. In this regard, MT will continue improving cooperation with third countries.

TCNs living in Malta will benefit from various integration measures which will be set up to improve their stay in Malta. An Integration Unit will coordinate the different sectors dealing with TCNs to provide them with a holistic service to their needs. Actions will be financed in the field of education to enhance the language and skills capabilities of the TCNs, together with additional cultural orientation measures to improve their knowledge about MT. Initiatives on the recognition of qualifications and experience may also be explored. In particular, minor asylum seekers and beneficiaries of international protection will be provided with preparatory classes in order to facilitate their entry into mainstream schooling. Parents will also be provided with training. Communication plans will also be devised in order to help the native Maltese

population better understand the TCNs living among them while helping them in adapting themselves to a more diverse society.

Capacity building will also continue to be provided to persons working with third country nationals to help and assist them in their work with tools which facilitate the carrying out of their duties.

NGOs will continue to be assisted in their work with third country nationals in different spheres, ranging from training, legal aid, social work assistance and measures to help migrants integrate in our society.

The Maltese authorities consider that the most humane and efficient method to return irregularly staying TCNs is to use voluntary return. MT will continue implementing Assisted Voluntary Return and Reintegration projects. The possibility of voluntary return will continue to be made available to those migrants wishing to avail themselves of it. In cases where the option of voluntary return is not taken, forced return will remain necessary.

Excluding TA, approximately 70% of the Fund will be dedicated to asylum, 21% to integration, 8% to return and 1% to solidarity.

2. BASELINE SITUATION IN THE MEMBER STATE

Summary of the current state of play as of December 2013 in the Member State for the fields relevant to the Fund

Malta has experienced heavy influxes of irregular migration over the years the majority departing from North Africa and proceeding to apply for international protection. A number of third-country nationals (TCNs) also arrive in Malta through legal channels.

The large number of TCNs who reach Malta by boat in an irregular manner poses particular challenges. In order to appreciate the challenges, Malta's geographic and demographic characteristics must be kept in mind. Population density stands at almost 1,300 persons/km², making it the most densely populated EU MS. Ever since 2002, irregular migrant arrivals remained consistently high, reaching a record 2,775 in 2008 (except 2010 with 47 arrivals). The number of irregular migrants was 1730 in 2011; 2255 in 2012; and 2435 in 2013 (detained persons: 2011 – 1579; 2012 – 1890, 2013 – 2008 and 2014 up to September - 568).

National legislation transposes EU Directives and establishes the process to be undertaken when irregular immigrants arrive. Detention may be applied, subject to the circumstances of each case, to persons irregularly entering Malta or whose presence in Malta is otherwise irregular, without discrimination of any kind. Whenever an irregular migrant is detained with a view to return, the authorities pursue efforts to return the person as soon as possible. Irregular migrants who apply for international protection are detained only if the reasons set out in the recast Reception Conditions Directive apply, when it proves necessary on the basis of an individual assessment of each case and if other less coercive alternative measures cannot be applied effectively.

The length of detention therefore depends on the circumstances of each case. Asylum seekers may not be detained for more than 12 months, although in practice most are released within less than 2 months pursuant to individual assessments. In 2014, out of 353 cases, 54% were released within 15 days. Detention does not apply to vulnerable persons, including all unaccompanied minors, women with children, families and disabled persons.

Due to the size of the island, the main challenge is the provision of accommodation (capacity at end 2013: 1200 and 2000 for closed and open centres respectively). This is felt more as a result of the changes with respect to the persons who are now arriving in Malta. In the past, single men used to predominantly reach our shores whereas in recent years whole families with children are more prevalent. This creates challenges in terms of the type of accommodation provided to address their needs. Over the years a number of projects were undertaken to improve accommodation at reception centres. A considerable percentage of funds allocated through ERF, including Emergency Funds, was used to supplement the actions financed through national funds. The national budget votes for asylum seekers amounted to €12.68; €11.08 and €10.08 million respectively for 2011, 2012 and 2013 does do not include expenses incurred by mainstream services (e.g. health services, education).

Given the limited resources available and the constant flow of asylum seekers, a number of other ERF projects were aimed at providing food, medical and psycho-social support and other essential services.

The need was felt for specific measures for vulnerable persons and all unaccompanied minors. Under the legislation unaccompanied minors are placed under state custody in terms of the Children and Young Persons (Care Order) Act. This ensures the same treatment as a Maltese minor, including schooling. The centres provide extra-curricular activities.

Health concerns of those arriving are also subject to both national (mainstream) and EU funded initiatives (isolation units within the Centres). However, given that highly infectious diseases have become more prevalent, these initiatives need to be complemented by a specialised appropriately equipped Unit within the general hospital.

With respect to the asylum system, nearly all of those who reach Malta irregularly apply for asylum. Asylum applications amounted to 1890, 2080, 2245 and 1022 in 2011 to 2014 (latter up to Sept) respectively. This puts pressure on the resources for processing and deciding on these applications, and for hosting them.

This is complicated since a large proportion of those who apply for protection are entitled to receive it because they originate from conflict regions (e.g. Horn of Africa). In fact, Malta's asylum recognition rate hovers at 50-60%, reaching a record 90% in 2012 (EU average in 2012 was 28%). The asylum determination process is carried out by the Office of the Refugee Commissioner (RefCom). Between 2012 and 2014 (latter till Sept) the number of persons recognised as refugees amounted to 35, 59 and 100 persons respectively, whilst persons granted Subsidiary Protection were 1239, 1686 and 707 respectively. RefCom has taken measures to continue improving the quality of asylum determination, including training, information provision and research.

Beneficiaries of protection can also benefit from relocation. A pilot project for the intra-EU relocation of beneficiaries of international protection from Malta (EUREMA) began in January 2012, and 277 beneficiaries were relocated to other MS. An extension of this project (EUREMA II) was undertaken, through which there were 14 beneficiaries by December 2013.

With respect to those who wish to return to their country or whose asylum application is rejected, return activities become relevant. The return procedures in respect of those whose asylum application is outstanding, even if on appeal, are suspended.

The Police Immigration Section has reviewed its return procedures in line with the Return Directive, including the procedure for issuing removal orders. A return decision is served on the TCN, who is given the opportunity to apply for a period of voluntary departure. This period can only be refused for the reasons established in the Directive. Following this period if the migrant fails to comply or else if the granting of this period is refused in line with the Directive, it is only then that a removal order is issued and the migrant is detained for the purpose of enforcing the return decision. Between 2008 and 2013, 779 irregular migrants were returned back to their country of origin.

Detention for the purposes of removal is subject to review after 3 months and to review by the Immigration Appeals Board after a period of detention of 6 months, as per the 'Common Standards and Procedures for returning illegally staying Third Country Nationals Regulations'.

During the interim evaluation of the European Return Fund, the consultants carried out an exercise whereby it was established that the EU funding (€1.37 million) at that stage only contributed 34% to the efforts in the field, which amounted to 3.99 million.

With respect to voluntary return, Malta has been involved in several programmes of this nature, with 360 migrants benefiting between 2008 and 2013. In this respect the European Return Fund has been used to finance most voluntary return operations. Such projects provided financial assistance to return and also re-integration assistance. Five voluntary return projects were undertaken between 2008 and 2013 (Restart 1, 2

3, and 4, and Dar 2) resulting in 289 migrants returned as at end 2013. The remaining 71 were financed through DAR 1 project under national funds.

One of the difficulties for return is that a large number of irregular migrants arrive undocumented and the difficulties encountered in relation to the procurement of travel documents for their return. In order to counter this, a number of projects using the Return Fund were undertaken. Two such projects were COMAM and COMAM II undertaken by IOM and the Ministry of Foreign Affairs and the Ministry for Home Affairs, aimed at enhancing diplomatic and administrative relations. While the objectives of establishing dialogue were achieved, difficulties related to the procurement of travel documents from countries of origin persist, which require continued effort to ensure that such countries uphold their obligations.

In an attempt to further strengthen cooperation with countries of origin and reinforce return management, projects MAREMCA I and II were undertaken with the aim of addressing challenges related to the return of migrants. Targeted training and knowledge transfer from experts from the Netherlands and the UK was offered in 2012 by implementing the Enhancing the Capacities of Return Management project (ECOR).

Malta also receives a number of TCNs who enter legally and reside in Malta. The inward movement of TCNs is regulated by The Immigration Act, which exempts foreign spouses of citizens of Malta and their dependents under 21 years from the requirement of periodical permission from the Immigration Authorities, the granting of temporary residence permits and the granting of permission for TCNs to work.

The total resident population of legally-residing TCNs amounted to 7380, 8128 and 9626 between 2011 and 2013.

With respect to the legislative framework for legal migration, the “Conditions of Entry and Residence of TCNs for the purpose of Highly Qualified Employment Regulations” (LN 433 of 2011) transposed the Blue Card Directive and the “Single Application Procedure for a Single Permit as regards Residence and Work and a Common Set of Rights for those Third-Country Workers legally residing in Malta Regulations” (LN 160 of 2014) transposed the Single Permit Directive.

Amendments were made to the national Status of Long term residents (TCNs) Regulations which transpose Directive 2003/109/EC, where integration measures were introduced in connection with the acquisition of such status. All relevant information on legal migration is made publicly accessible on the website of the Employment and Training Corporation (ETC - public entity responsible for employment) and at the Citizenship and Expatriate Affairs Department.

Malta has also embarked on various initiatives and implemented projects with the aim of facilitating integration. During the 2007-2013 programming period, projects were implemented to provide TCNs with courses in the English and Maltese languages and culture. In addition, training has been provided to front liners in the provision of services to TCNs such as the staff at the Visa Unit, the Citizenship and Expatriate Affairs Department, who are in charge of the issuance of residence permits and ETC which issues employment licences (circa 22 persons for each of 16 sessions). The Health Ministry also embarked on a number of measures aimed at promoting integration. The National Commission for the Promotion of Equality continued to raise awareness and to disseminate information on equality, diversity and non-discrimination issues including racism and xenophobia, and undertook research and training projects to ensure equal treatment and combat racism.

Moreover, through national funds TCNs are assisted through social welfare which provides them with the same services granted to Maltese nationals. ETC provides equal access to services it offers through job centres including information on the availability of jobs within the private sector.

The Foundation for Social Welfare Services which is made up of 3 Agencies offers a number of services to TCNs including safeguarding and promoting the well-being of children, families and the community through the development and provision of psycho-social welfare services, service in health promotion, prevention, treatment and rehabilitation to persons with drugs, alcohol and other addictive problems and innovative personalised support, expertise and advocacy to persons with disability.

A number of efforts undertaken in this field were aimed at improving the TCNs acceptance in the Maltese Community. These included a number of projects such as the presentation of the cuisine of migrants in various public events and a television programme on the different cultural and ethnic backgrounds of people living in Malta.

With respect to education, the number of TCNs in all schools in Malta increased significantly. In the majority of cases in State primary schools, the complementary education and the literacy support teachers are asked to support language acquisition of such learners whereas in the Secondary Sector, teaching of Maltese is either provided as a second/additional language or by the Core competences support classes. In order not to leave TCNs in the mainstream classroom without the adequate language provisions in Maltese, English or both, the Ministry for Education and Employment has embarked on a number of projects undertaken under the European Fund for the Integration of TCNs and the European Refugee Fund in order to provide training to all complementary education teachers and literacy support staff with regard to teaching English as a foreign language and to support TCNs in their literacy uptake (135 teachers trained). It is part of the Ministry for Education and Employment's strategy to strive towards the creation of an effective climate towards TCN learners and families.

Prior to 2013, integration actions formed part of various initiatives by different departments. Following a recent change in administration, the Ministry for Social Dialogue, Consumer Affairs and Civil Liberties was set up and given responsibility for the integration of TCNs, putting the integration of TCNs higher on government's agenda. MSDC has a total budget for 2014 of €4.7 million.

Efforts to integrate beneficiaries of international protection and asylum seekers will be sustained through integration-oriented courses. Such courses will include information about Maltese and European culture, employment-oriented training and language training. The Ministry responsible for integration shall ensure that mainstream integration services are accessible to beneficiaries of international protection living in the community.

3. PROGRAMME OBJECTIVES

Specific objective	1 - Asylum
<p>Malta's long term objective is to refurbish its' centres and open a new reception facility built to cater for all the needs of asylum seekers. This facility will also increase capacity in open centres by 400 places, whilst envisaging that reception quality will also be improved. The system for the reception of asylum seekers will be maintained, where accommodation will be provided via Initial Reception Centres (IRC), Open and Detention Centres. Detention will only be exercised when it proves necessary on the basis of an individual assessment of each case in line with the Reception Conditions Directive . Asylum seekers who are not detained or are released from detention will continue being accommodated in secured Open Centres.</p> <p>Asylum seekers will continue to be provided with food, daily allowances and other integration services, including training, employment services, health, psychological interventions, legal assistance, recognition of qualifications and skills amongst others. Families will be accommodated together at all times, ensuring family unity. Malta will continue facilitating the family reunification of Refugees in line with the pertinent acquis. Medical and related assistance will continue to be provided to asylum seekers and complemented through a specialised unit to deal with infectious diseases.</p> <p>Those who are entitled to international protection will be offered accommodation at open centres. The centres will encourage the integration process and residents will be assisted to move out to independent accommodation within 12 months. It is emphasised that Open Centre accommodation shall be in conformity with relevant reception standards, but temporary.</p> <p>It is Malta's goal to continue to ensure that the asylum determination process is as short as possible. Investment will be made in RefCom to ensure that the fulfilment of this objective is sustained. Furthermore, staff working with migrants will undertake capacity building activities in line with EASO guidelines to improve their operations.</p> <p>Special provisions for vulnerable persons will be undertaken, including separate accommodation arrangements within the Open Centres, or within apposite premises, further to provision of psycho-social assistance, including mental health services where necessary. The appointment of Social Professionals should further facilitate the identification and referral process of vulnerable persons whose vulnerability is not manifest. Minors below 18 years of age will continue to be provided with residential care services and have access to schooling.</p> <p>As defined in Article 9(2) of Regulation 516/2014, the integration Measures defined in SO2 will also be provided to different categories of TCNs, including beneficiaries of international protection, resettled or transferred persons and vulnerable persons.</p> <p>Target group provided with assistance will amount to 16,100, reception capacity will increase</p>	

by 400, and number of persons trained in asylum topics will amount to 140.

National objective

1 - Reception/asylum

Asylum seekers will only be accommodated in Closed Centres when it proves necessary on the basis of an individual assessment of each case and if other less coercive alternative measures cannot be applied effectively. Vulnerable asylum seekers, minors, and those not detained will continue being accommodated at Open Centres. Asylum seekers released from IRC, detention and beneficiaries of international protection will be offered accommodation at open centres until they can move on to independent accommodation.

The following funding priorities will be met with national and Union funds.

The renovation, upgrading and furnishing of currently existing structures and the setting up of new Open Centre to increase capacity by 400, providing separate accommodation to different categories, including minors and other vulnerable persons.

Material aid will continue to be provided especially health and other essential services, including the support of social workers, psychologists and other professionals and the provision of a daily per diem allowance.

The need to treat asylum seekers with highly infectious diseases will be met through the part financing of a specialised unit with the general hospital. Primary and secondary health services including emergency, as well as mental health services will also be provided free of charge.

Training in line with the EASO guidelines will be provided to staff working with migrants.

A protection system for unaccompanied minors will continue to be provided. The system consists of legal guardianship, schooling and support services (medical and other specialised services) as needed. Action will continue to be taken with respect to family tracing.

Other specific measures will be undertaken for vulnerable persons in order to promote, safeguard (and provide for) their psycho-social welfare, including accommodation in secured Open Centres or other premises.

Free legal assistance for asylum procedure (on appeal) will continue to be made available.

Integration programmes, including employment services, job placements and training will be

provided to the target group. The target group living in the community shall have access to 'mainstream' services.

National objective

2 - Evaluation

It is the Government's aim to continue to strengthen the role of the Office of the Refugee Commissioner (RefCom) to enable the more efficient fulfilment of its duties in providing a decision at first instance in 6 months or less.

The following funding priority will be met with national and Union funds.

The RefCom will continue their actions to assess the asylum process, follow-up cases, in particular in relation to Dublin III and compile statistical data, or COI-related actions in cooperation with EASO.

For asylum applications, investment will be made in training, including training provided by the EASO and human resources at RefCom, to continue delivering first instance decisions within 6 months.

The Dublin Unit within RefCom will be set up in order to be better equipped to ensure the proper application of Dublin III procedures.

In case of an unusually large influx of asylum seekers use will be made of existing sites to address such a situation in order to ensure adequate reception conditions. Other measures (e.g. EASO additional support) will be utilised in such a case.

Interpreters will continue to be made available by RefCom for asylum determination.

National objective

3 - Resettlement

No actions will be carried out under this national objective.

Specific objective

2 - Integration/legal migration

In line with Malta's priorities, efforts to improve the practices it has already adopted will continue. The main goal is for a more tolerant and integrated society through the actions supported by this Fund.

The Human Rights and Integration Directorate (HRID) within MEAE, responsible for integration as of June 2017, set up an Integration Unit to consolidate a strategy on integration focusing on vulnerable groups, the improvement of integration measures, complementing services offered by other Ministries, Departments and NGOs and information campaigns to be addressed to the receiving society.

Malta considers that legally residing TCNs need to be given good working knowledge of Maltese and English, and be provided with cultural orientation classes to equip them with information on Maltese and European values, whilst helping them enter the labour market and access goods and services.

Malta aims at attracting TCNs in areas where labour market shortages exist. Efforts are hence directed at establishing the type and the extent of skills required and the shortages being experienced in particular occupational sectors.

Integration will be treated as a two-way process: where it requires adaptation on the part of the newcomer but also by the native population. Measures will be undertaken to inform the Maltese population in this respect. Integration in a democracy also presupposes civic participation by the TCNs in society.

The Integration Unit will aim at managing and harmonising all the Public Services that TCNs have the right to access to in accordance with EU and national legislation.

With respect to education, it is the Ministry for Education and Employment's intention to continue to support TCN children in schools. Actions will continue to focus on the services and options that the education department and schools can supply. Actions to recognise diversity with other integration measures will be enhanced in schools while staff training and psycho-social support programmes will also be supported.

EU funds will also be used to finance training for bodies dealing with integration issues.

Integration actions and cultural orientation classes will be provided to those target groups living in the community with the aim that they shall have access to mainstream integration services.

As stipulated in Article 5(1) Reception and Asylum Systems – integration-related measures as defined above will also be provided to persons who enjoy refugee status or subsidiary protection, to those who have applied for one of the forms of international protection, to those who enjoy temporary protection and also to persons who have been resettled in or transferred from a Member State.

Victims of Human Trafficking will be given specialised treatment and related services.

It is envisaged that 2000 TCNs per year will be targeted, whilst 10 integration initiatives will be in place.

Support under this fund will also help to develop, monitor and evaluate integration policies in Malta.

National objective	1 - Legal migration
---------------------------	---------------------

No actions will be carried out under this national objective.

National objective	2 - Integration
---------------------------	-----------------

One of the main issues which hampers integration of TCNs is their linguistic ability to communicate with the local population and which restrains their participation in the labour market. Since the majority lack knowledge of their host country's language, history, culture and politics, it is envisaged that for those already in Malta at an early age, training courses will be provided by the state to all compulsory school aged TCN learners to prepare them for mainstream education in Malta.. These initiatives will build upon measures that have already been undertaken in this field and financed through the European Fund for the Integration of TCNs, whereby teachers were trained and software procured to analyse and assess the knowledge of TCNs.

Language training, cultural orientation classes and skills enhancing training to make them more employable will continue to be provided to all TCNs living in Malta. The needs of the TCNs will be continuously assessed and all stakeholders will be involved in identifying the best measures needed to target their needs.

The following funding priorities will be met with National and Union funds.

Effort will be focused on schools where third country national minors will be participating in classes together with European children. This will be done in order to have integration made possible in the early years, to guarantee successful integration during adulthood. In turn, it will also instil in the new generation of local youngsters a sense of acceptance and normality to live with third country nationals. Attention will also be given to the parents of the minors who will also be granted the possibility to follow their children and be given all the necessary education to support themselves and their children.

Training and education will also be extended to all third country nationals who wish to enhance their linguistic skills and would like to follow a cultural integration programme. Furthermore skills enhancement trainings for TCNs will be given in relation to the labour market needs. Assessments will be carried out amongst TCNs to act on the difficulties they

will be encountering to ameliorate their situation.

Measures will also be undertaken to implement the Action Plan on the integration of third country nationals. Actions carried out by civil society organisations and regional and local authorities in the context of comprehensive integration strategies would notably promote an integrated approach to the integration of third country nationals, including through enhancing the cooperation between relevant actors.

National objective	3 - Capacity
---------------------------	--------------

Although integration has always been a priority for Malta, in previous years this was tackled differently by different entities according to their field of work. In order to have a common front with respect to integration, the HRID will be setting up a comprehensive structure which holistically provides for the needs of TCNs residing in Malta. An Integration Unit will therefore be set up with the aim of introducing an integration perspective in all policies, at all levels and at all stages, by all the actors involved in decision-making. This improved coordination between Ministries, particularly of Home and Security, Education, Health, Social Services and Social Dialogue, is planned to be achieved through the setting up of an Inter-ministerial Committee for integration between the Ministries.

Besides the contributions of all Ministries, the NGOs working in the field of migration and integration will be incorporated, with a view of reducing duplication of activities. In addition to a reform in policies with respect to integration, the Integration Unit within HRID will ensure the introduction of actions targeted at the Maltese community in order to better understand TCNs.

The following funding priorities will be met with National and Union funds.

The main objective is to establish an Integration Unit with a task to act as an umbrella organisation to coordinate and harmonise all the services vis-a-vis immigration, residence and employment of TCNs. The Unit will be responsible for the establishment of a National Integration Policy for Malta and its continuous assessment and review through the involvement of all stakeholders.

Activities linked to the assessment of the needs of the TCNs and the setting up of a cultural awareness programme will also be coordinated through this Unit. Training is also envisaged to be provided to all those involved to help them in their work. In addition the Integration Unit will be tasked to devise a Communication Plan to help raise awareness within the Maltese community on diversity and minority issues and how a community can experience economic and social growth through greater integration.

The above initiatives will also be enhanced through an investment in infrastructure which will support specific target groups such as minor TCNs and Victims of Human Trafficking. Furthermore, support will be given to those TCNs who are victims of human

trafficking through tailor-made support and shelter devised on a tailor-made basis by the Foundation for Support and Welfare Services (FSWS)

Specific objective

3 - Return

The Maltese authorities consider that the most humane and efficient method to return irregularly staying TCNs is through voluntary return. Therefore the main target for Malta is to continue to promote voluntary return through the relevant projects. Opportunities of voluntary return will be made available in a determined and systematic manner amongst irregular migrants, offering them the option of being assisted to return voluntarily to their CoO and restart their lives through reintegration assistance, which will be monitored to ascertain its appropriate usage. Returnees will also be given a lump sum to cover any expenses s/he may incur on settling back in their CoO. Information on voluntary return will also continue to be provided to asylum-seekers who have not yet received a final decision in relation to their request for international protection.

In cases where the option of voluntary return is not taken, forced returns will remain necessary to repatriate such TCNs who have no right to stay. In order for these returns to be effected, cooperation efforts with CoO will continue to be pursued to obtain the necessary documentation. In addition the relevant authorities shall continue implementing forced return monitoring procedures in accordance with the Return Directive. Police officers will carry out patrol activities to identify overstaying persons and deport irregular immigrants through specialised equipment to help identify fraudulent documents.

The role of monitor is being fulfilled by the Board of Visitors for Detained Persons.

In setting the targets for this programme, consideration was taken of the funding possibilities under the European Return Fund (up to June 2015), and the composition of the irregular migrants reaching Malta, in particular recent changing trends.

It is a well-known fact that engaging countries of origin in the attainment of the necessary documentation in both voluntary return and forced return is a long and difficult process. Malta will hence continue to look at methods to facilitate further engagement of this nature with these countries and to consolidate agreements reached

In fact, an innovative pilot project is being proposed to setup a facility in a third country to provide temporary accommodation for returning migrants. This will compliment current strategies and cooperation mechanisms which Malta is embarking on.

Hence in terms of return management, the overall strategy is to concurrently implement voluntary and forced return operations which are strongly interlinked and have a mutually reinforcing effect and maintain credibility in enforcing the law, a prerequisite for creating an

area of freedom, security and justice.

25 persons will be trained on return-related topics while 5,400 persons will receive pre- or post-return reintegration assistance. 100 persons will be returned voluntarily and another 400 will be returned under forced return, while 10 monitored removal operations will be financed.

National objective	1 - Accompanying measures
---------------------------	---------------------------

Actions under this objective will be financed through national funds.

Malta will invest in the detention centres with a view to providing adequate accommodation to those who enter irregularly and apply for asylum and need to be detained, and to those who are being detained pending their deportation.

Other actions will continue to be provided such as provision of social assistance, health and education services, etc.

As part of the transposition of the recast reception conditions directive, alternative measures to detention (e.g. regular reporting) will be introduced.

National objective	2 - Return measures
---------------------------	---------------------

Emphasis will continue to be placed on the possibility of voluntary return, in fact various voluntary return programmes have been implemented by Malta in recent years and the aim is to continue to do so. In cases where the right of stay of the migrant is no longer present and the migrant does not opt for voluntary return, activities of forced return will have to be implemented as per the laws of Malta. This will entail the attainment of travel documentation, the identification of the necessary escorts and the flights to be utilised. In all instances the migrants are informed of their options and possibilities and are made aware of their right or obligation (as the case may be) to leave the country.

The main Union funding priorities envisaged focus primarily on voluntary return without excluding forced return actions. As part of voluntary return, outreach and information dissemination will be conducted amongst all migrants. This will be followed by counselling to potential and confirmed returnees. Logistical support, including legal and language aid, medical escorts to provide assistance during the trip, together with the provision of lump sums and reintegration assistance will be given. In addition for those who wish to further their skills before they leave, training can also be provided prior to their return. Monitoring and internal evaluation will be undertaken in order to constantly improve the standard operational procedures.

When the migrants' stay in Malta becomes illegal due to a change in status, action will be

taken to remove the said TCNs from Malta by utilising activities of forced return. The said activities will involve the attainment of the necessary travel documentation, logistical support in relation to their travel back to their CoO as well as the imposition of all the necessary security measures. These will be complemented with equipment that will give an accurate analysis of any forged documents. Biometric scanners will be used to facilitate deportation of illegal immigrants. In addition, police officers will be carrying out patrol activities in order to identify overstaying persons. MPF will also host delegations from CoO to cooperate with the Police on return matters.

Measures will also be undertaken to implement the EU Action Plan on return and possible follow-ups on return measures aiming at enhancing the effectiveness of the EU system to return irregular migrants, which may include adequate detention capacity and possible alternatives for UAMs and other vulnerable groups.

Furthermore an innovative pilot project is being proposed to setup a facility in a third country to provide temporary accommodation, psychosocial support and reintegration orientation to returning migrants to facilitate return and reintegration.

National objective	3 - Cooperation
---------------------------	-----------------

One of the vital necessities required for any repatriation to be successful is an identification document that can be used for travel. The majority of migrants arriving in Malta carry no identification documents and claim to come from countries where no local representation is present in Malta. Hence cooperation with consular officers from the nearest embassies of the CoO, situated close to Malta is sought in order to interview migrants desiring to return back to their countries. In addition in order to make sure that readmission and reintegration assistance is well exercised in the CoO, Malta's cooperation with the CoO needs to be strengthened and reinforced.

Malta will continue to enhance its return management activities through cooperation with CoO and Member States through an exchange of best practices.

Specific objective	4 - Solidarity
---------------------------	----------------

Contrary to previous years, the migration situation in Malta during 2018 was marked with the disembarkation of sea arrivals through a number of vessels. During 2018, Malta registered 1445 boat arrivals according to UNHCR and official national statistics, with migrants of different nationalities, including Syrian, Somalian, Eritrean and Libyan origins amongst others. While some of these people applied for international protection and remained in Malta, a number of those arriving on boats are being relocated to other EU countries

following ad hoc agreements between EU Member States.

In this regard, the Ministry for Home Affairs, who is responsible for reception measures will embark on a project to claim the costs being incurred for the initial reception of these persons.

National objective

1 - Relocation

The relocation exercises undergoing in Malta are in the line of European Solidarity and the Refugee Relocation System. As explained earlier, Malta has initiated cooperation agreements with other Member States in order to transfer persons who are in need of international protection. Whilst in 2018, a total number of 1445 have arrived by boat, by March 2019, a total of 237 boat arrivals have been registered according to national statistics. Given that the trend seems to be ongoing, Malta has as a framework adopted the spirit of Council Decision (EU) 2015/1601 and will apply for financial support according to the already established lump sums deliniated in Article 10 (1) (b). This will ensure that the actual costs necessary to transfer an applicant to the Member State of relocation are adequately covered.

INDICATIVE TIMETABLE

Specific Objective	NO/SA	Main action	Name of action	Start of planning phase	Start of implementation phase	Start of closing phase

4. SPECIAL CASES

4.1 Resettlement

Justification of the number of persons to be resettled

Pledging for 2016-17, see Conclusions of 20 July 2015 of the Representatives of the Governments of the Member States meeting within the Council on resettling through multilateral or national schemes 20,000 persons in clear need of international protection and Commission Recommendation of 8 June 2015 on a European resettlement scheme. In the 2018-2020 pledging exercise (50,000 scheme - Commission Recommendation (EU) 2017/1803 of 3/10/2017), Malta pledged to resettle 20 persons and this was approved by the Commission. MT will however resettle this quota of 20 persons in the eligibility period for the 2020 pledging exercise.

Pledging plan

Vulnerable groups and Common Union resettlement priorities (Lump Sum 10 000€ per person resettled)	2014-2015	2016-2017	2018-2020
Regional Protection Programme in North Africa (Egypt, Libya, Tunisia)			20
Syrian refugees in the region	0	14	
Total union priorities	0	14	20
Grand total	0	14	20

4.2 Transfer & relocation

	From	To	2014-2015	2016-2017	2018-2020
Transfer		Malta	0		
Relocation (2015/1523)	Greece	Malta	0	24	-20
Relocation (2015/1523)	Italy	Malta	0	36	
Relocation (2015/1601)	Greece	Malta		97	
Relocation (2015/1601)	Italy	Malta	0	31	

4.3 Admission from Turkey (2016/1754)

Pledging plan: Number of persons to be admitted from Turkey per pledging period

	2014-2015	2016-2017	2018-2020
Admission			

5. COMMON INDICATORS AND PROGRAMME SPECIFIC INDICATORS

Specific objective		1 - Asylum			
Indicator	Unit of measure	Baseline value	Target value	Source of data	
C1 - Number of target group persons provided with assistance through projects in the field of reception and asylum systems supported under this Fund	Number	0.00	16,100.00	Project reporting	
C2.1 - Capacity (i.e. number of places) of new reception accommodation infrastructure set up in line with the minimum requirements for reception conditions set out in the EU acquis and of existing reception accommodation infrastructure improved in line with the same requirements as a result of the projects supported under this Fund	Number	0.00	400.00	Project reporting	
C2.2 - The percentage in the total reception accommodation capacity	%	0.00	11.00	Project reporting	
C3.1 - Number of persons trained in asylum-related topics with the assistance of the Fund	Number	0.00	140.00	Project reporting	
C3.2 - That number as a percentage of the total number of staff trained in those topics	%	0.00	90.00	Project reporting	
C4 - Number of country of origin information products and fact-finding missions conducted with the assistance of the Fund	Number	0.00	1.00	Project reporting	
C5 - Number of projects supported under this Fund to develop, monitor and evaluate asylum policies in Member States	Number	0.00	1.00	Project reporting	
C6 - Number of persons resettled with support of this Fund	Number	0.00	0.00	Authority in charge of transferring the persons	

Specific objective		2 - Integration/legal migration			
Indicator	Unit of measure	Baseline value	Target value	Source of data	
C1 - Number of target group persons who participated in pre-departure measures supported under this Fund	Number	0.00	0.00	Project reporting	
C2 - Number of target group persons assisted by this Fund through integration measures in the framework of national, local and regional strategies	Number	0.00	14,000.00	Project reporting	
C3 - Number of local, regional and national policy frameworks/measures/tools in place for the integration of third country nationals and involving civil society, migrant communities as well as all other relevant stakeholders, as a result of the measures supported under this Fund	Number	0.00	10.00	Project reporting	
C4 - Number of cooperation projects with other Member States on integration of third-country nationals supported under this Fund	Number	0.00	0.00	Project reporting	
C5 - Number of projects supported under this Fund to develop, monitor and evaluate integration policies in Member States	Number	0.00	1.00	Project reporting	

Specific objective		3 - Return			
Indicator	Unit of measure	Baseline value	Target value	Source of data	
C1 - Number of persons trained on return-related topics with the assistance of the Fund	Number	0.00	25.00	Project reporting	
C2 - Number of returnees who received pre or post return reintegration assistance co-financed by the Fund	Number	0.00	5,400.00	Project reporting	
C3 - Number of returnees whose return was co-financed by the Fund, persons who returned voluntarily	Number	0.00	400.00	Project reporting	
C4 - Number of returnees whose return was co-financed by the Fund, persons who were removed	Number	0.00	400.00	Project reporting	
C5 - Number of monitored removal operations co-financed by the Fund	Number	0.00	10.00	Project reporting	
C6 - Number of projects supported under the Fund to develop, monitor and evaluate return policies in Member States	Number	0.00	1.00	Project reporting	

Specific objective		4 - Solidarity			
Indicator	Unit of measure	Baseline value	Target value	Source of data	
C1 - Number of applicants transferred from one Member State to another with support of this Fund	Number	0.00	300.00	Authority in charge of relocation	
C2 - Number of cooperation projects with other Member States on enhancing solidarity and responsibility sharing between the Member States supported under this Fund	Number	0.00	0.00	Project reporting	

6. FRAMEWORK FOR PREPARATION AND IMPLEMENTATION OF THE PROGRAMME BY THE MEMBER STATE

6.1 Partnership involvement in the preparation of the programme

In preparation of the programme, a partnership approach was undertaken, which achieved a wide consultation and included Government Departments and Agencies, Voluntary Organisations, NGOs and International Organisations.

This was done by involving all stakeholders in the compilation of the Malta Key Policy Issues Paper. A number of entities were invited during the Policy Dialogue and were consulted in respect to the finalisation of the minutes of the said Dialogue.

In identifying the strategies and key requirements in the field of asylum and migration, all the relevant Government entities were approached in order to provide their planned strategies for the next 7 years and what actions/ areas would need to be undertaken to achieve these strategies. The methodology adopted in terms of Government entities was the nomination of a Key contact person for the relevant Ministries. A feedback template was disseminated, as well as guidelines for compilation of template and a worked example to facilitate compilation.

With respect to current NGO users of the SOLID fund, these were approached and also provided with a template. Support was provided, as necessary, in terms of articulating proposals and the establishment of key performance indicators. Such support included the facilitation of meetings and discussions.

To ensure that all NGOs were provided with the opportunity of providing feedback, a public consultation session with NGOs was held and an invitation was issued via email to all current beneficiaries as well as sent out to all registered NGOs with the Commissioner for Voluntary Organisations. During this consultation session a presentation was given on the objectives of the fund as well as clear explanation of the logistics for submission of feedback and input.

In addition all the information on the public consultation session was uploaded on the Ministry website dedicated to the 2014-2020 programming period as well as on the Funds and Programmes Division website.

6.2 Monitoring Committee

A Monitoring Committee (MC) was set up whereby stakeholders from all the relevant sectors would be members of the MC. The MC would be chaired by the Permanent Secretary of the Ministry responsible for European Affairs or his delegate, or the RA in his absence. Members from Government bodies representing the education sector, health sector, integration sector, employment sector and home affairs will be asked to sit on the MC. Representatives from stakeholders and or civil society will also be appointed to the MC. The members of the MC will meet to be kept abreast of all the developments that would be undertaken by the Programme in the field of asylum and migration.

Terms of reference were drafted by the RA and approved by the members of the MC. The MC will be expected to meet at least once a year, and presentations would be provided on the

implementation, monitoring and evaluation aspects of the AMIF. The Chairperson would also be empowered to call for additional MCs if and when these are deemed relevant.

6.3 Common monitoring and evaluation framework

The RA will make use of various monitoring tools to evaluate the implementation of the programme. In cases of changes in national context and characteristics prevalent over its implementation, the RA will revise the Programme after consultation with the relevant stakeholders and the MC and submit the revised version to CION for approval.

The achievements of the programme will be monitored through the project indicators. An information system will contain details on the indicators to be achieved and the achievements will be reported by the Beneficiaries and monitored by the RA through the system.

On a day to day basis the projects will be assisted by the staff within the RA. Monthly bilateral meetings with beneficiaries may be carried out, based on the context and risk of the project, so to ensure that the RA is made aware of any issues hampering the implementation of the projects.

The Beneficiaries will document the monitoring of their project in reports which will have to be presented to the RA. These will in turn be verified by the RA through on the spot checks to assess the correct implementation, whilst also conducting physical checks where applicable.

All the information gathered will in turn be translated into annual reports and any other report requested by the EC.

6.4 Partnership involvement in the implementation, monitoring and evaluation of the national programme

During implementation the RA all the stakeholders in the various fields in which the Programme will be giving assistance that is the educational sector, the home affairs and national security sector, the health sector as well as stakeholders involved in integration on the achievements or otherwise that will be made by the Programme. This will be achieved primarily through the MC whose membership is expected to ensure a broad coverage of stakeholders involved in the area. The MC will also discuss the implementation, monitoring and evaluation aspects of the AMIF ensuring a broad consultation process.

6.5 Information and Publicity

Building on the web strategy followed during the programming period 07-13, the RA shall continue to provide information about the AMIF Programme on the dedicated webpage under the general website for the FPD (acting as the RA) namely eufunds.gov.mt. which provides information on and access to the NP; to inform potential beneficiaries about funding opportunities; and publicise to Union citizens the role and achievements of the Fund through information and communication actions. The RA ensures transparency on the implementation of the NP and maintains a list of actions supported by the NP accessible through the website.

A new dedicated joint webpage has been developed for the new programming period 2014-2020. The new website will be in line with the EU Web Accessibility Directive (2016) and compliant with the responsive design perspective. The new webpage shall include information on the overall objectives of the AMIF Programme, and featuring a section with the latest news (including photos and videos) about activities carried out locally. Latest news will also include and feature the publication of calls for proposals and related documents and information. This particular section will be updated in real time and on a day-to-day basis in order to ensure the validity and significance of the news item. It will also include links to the programme and incorporate copies of all relevant documentation about all funded projects related to this period under AMIF programme.

6.6 Coordination and complementarity with other instruments

For the 14-20 programming period, coordination between the ESI Funds and other Union and National funding instruments will be ensured through the framework of the Inter Ministerial Coordination Committee (IMCC) already set up under the 07-13 period. The aim of the IMCC is to maximise resources whilst reducing the risk of overlap or duplication of effort by providing direction on the demarcation between different funds and programmes, consultation where potential overlaps are identified and exchanging information about any changes required to the individual programmes. The IMCC is expected to meet on a regular basis and is made up of various MA, IB and NCP for various programmes, amongst others.

With respect to mechanisms to assist beneficiaries use the funds in a complementary way, NGOs and Local Councils are assisted by Malta – EU steering & action Committee (MEUSEC) which is the entity in charge of disseminating EU related information and assisting local councils and civil society organisations to secure EU funds., while the PPCD and the FPD within the Ministry for European Affairs, are always available to provide advice to potential applicants and beneficiaries on the opportunities of support available through the different funds and queries are referred between units according to their responsibilities.

In addition to the active participation in the IMCC which brings together all the representatives of the funding programmes available for Malta, other funding programmes such as the European Maritime and Fisheries Fund and the European Agricultural Fund for Rural Development fall under the direct responsibility of the Funds and Programmes Division which is also in charge of ISF. Similarly centralised funds such as the EU Civil Protection Mechanism are also coordinated by the Funds and Programmes Division, therefore excluding all the possibility of double funding as it is the same entity which processes payment applications, apart from also verifying that projects complement each other and are directed under the most suitable funding programme. Synergies and complementarity will be ensured with EU policies and financial instruments in third countries. This applies with regard to measures under the Home Funds involving third countries, and measures under the external instruments such as the Development Cooperation Instrument, European Development Fund and the European Neighbourhood Instrument. EU policies and initiatives, such as Mobility Partnerships, Common Agendas on Migration and Mobility, the Return Pilot, Regional Development and Protection Programmes, and the Dialogues building on the EU-Africa Strategy such as the Rabat and Khartoum Processes will also be taken into account in order to ensure that synergies are maximized and duplication avoided. This will be done through the involvement of the relevant Ministries and through coordination with the EU delegations in third countries.

6.7 Beneficiaries

6.7.1 List of five main types of beneficiaries of the programme

State/federal authorities, local public bodies, non-governmental organisations, international public organisations, national Red Cross, International Committee of the Red Cross, the International Federation of Red Cross and Red Crescent Societies, private and public law companies, education/research organisations, social partners.

6.7.2 Direct award (if applicable)

The Refugee Commissioner is responsible to receive, process and determine asylum applications.

Activities of Forced Return are carried out by the MPF in view of the de jure monopoly existing in return management.

Detention Services enjoys a de jure monopoly in the management of closed reception centres.

Agency for the Welfare of Asylum Seekers is solely responsible for the welfare of refugees, beneficiaries of protection and asylum seekers.

MEDE is responsible for compulsory education in schools and through Jobsplus is in charge of the issuance of work permits for migrants.

MEAE is responsible for the policies of equality, anti-discrimination and integration.

MFH is responsible for providing primary and secondary national health services in Malta.

MFTP is responsible for maintaining Malta's external relations and the management of its international diplomatic missions.

FSWS is responsible for provision of social support services in cases of potential Victims of Human Trafficking.

7. THE FINANCING PLAN OF THE PROGRAMME

Table 1: AMIF Financial plan

Specific objective / national objective / specific action	Total
