

Health Related Infrastructure

2007-2013 Programming Period

European Union
European Structural and Investment Funds

Health Related Infrastructure

- ▶ Circa 2.6 million patients yearly are given some form of treatment in Government Hospitals and Primary Health Centres.
- ▶ A total of €71M were invested in health infrastructure during the 2007-2013 programming period.
- ▶ Most notable new health related investments in Malta are: the new Sir Anthony Mamo Oncology Centre and the Medical Assessment Unit at Mater Dei.
- ▶ This is over and above other investments undertaken through OP II intended to address human capital, enhancing skills and training.

Detailed assessment: health projects

Sir Anthony Mamo Oncology Centre

- ▶ The new centre replaced the Sir Paul Boffa Hospital and provides a contemporary oncology facility offering advanced cancer treatment.
- ▶ It specializes in services for oncology and haemato-oncology patients through the use of modern and technologically advanced equipment.
- ▶ 9 new oncology services were introduced to the benefit of 2,946 patients.
- ▶ This hospital is also serving as a teaching centre for medical, nursing and other professionals.

Detailed Assessment – Health projects

Development in Screening and Radiological modalities in Health

A number of investments aimed to develop screening and radiological modalities in health have been carried out:

- To improve diagnostic modalities;
- To contribute to a better quality of life of all Maltese citizens; &
- To provide equity and access to quality health services.

Detailed Assessment – Health projects

Medical Assessment Unit

Intended to provide citizens with a better quality of life by improving the health service at Mater Dei Hospital:

- ▶ By allowing a safer, timelier and improved admission process for all medical patients;
- ▶ By reducing overcrowding, cutting waiting times, and improving treatment efficacy & turnover efficiency; and
- ▶ By improving ambulance response across the islands in cases of emergency, whilst enhancing survival rates.

Health Infrastructure and equipment

Other complementary projects co-financed by ESF 2007-2013

- ▶ ESF 1.211- ePortfolio for Postgraduate Medical Training
- ▶ ESF 4.174 - Training Health Care Professionals for Integrating Acute and Community Care
- ▶ ESF 4.175 - Capacity Building for Medical Physics Services in Malta
- ▶ ESF 4.280 - Training in standards and performance monitoring for hospitals in Malta
